## STINGIR FLIP TO THE SIDE MOUNT

AGM Global Vision has partnered with American Defense Manufacturing to design a new rail-mountable flip-to-side mount for its ever-popular StingIR thermal devices. The StingIR's popularity stems from its flexibility, as it was originally designed to work as a helmet-mountable monocular, a hand-held monocular and as a clip-on device when paired to a daytime glass optic. This new flip-to-side mount gives even more variability to StingIR owners by allowing quick transition out of the daytime optic's sight path by simply pulling the unit off the center line of the top rail. This design motion will permit StingIR users whose primary use is that of a clip-on to leave the unit mounted to their primary rail, even when utilizing their daytime optic in daytime engagements.

Coming in at only 4.4 ounces, this new mount will add very little additional weight to the weapon. Also, like all American Defense Manufacturing mounts, this New StingIR flip-to-side mount will offer easy tightening adjustability in the field with no additional tools required.

Weight: 125 g / 4.4 oz

Dimensions: 44 x 63 x 32 mm / 1.75 x 2.5 x 1.25 inches

- **Fast and easy installation**
- **Lightweight and durable all-metal design**
- **For mounting to any Weaver or Picatinny rails**
- **Easy-to-use adjustable brackets with torque preset**
